SKILLS

Hard Skills

- **Languages:** Python(Expert), Golang, Java; Familiar with C++, C, Rust and Lua
- **APIs & Real-time:** RESTful & GraphQL API development, Websockets, Webhooks.
- **Databases & Caching:** PostgreSQL, SQLite, MongoDB, Firebase; Redis and Valkey
- **DevOps & Infrastructure:** Docker & Docker Compose; Deployment on clean Linux server, Server management.
- **Monitoring Systems:** Prometheus and Grafana

Soft Skills

- **Leadership**
- **Methodology:** Agile workflows and cycles
- **Tools:** Jira & Git/Github

Languages

- Ukrainian - C1
- English - B2
- Dutch - A1
- German - A1

Profile

Aspiring Software Engineer with a focus on Scalable Backend Systems and Network Automation. Experienced in Python (FastAPI/Django), Golang(Echo) and Cloud-Native technologies (Docker). Eager to contribute to the development of high-performance infrastructure and automated network management within a cutting-edge technological environment.

Professional Experience

Company: Elladium Holding 08/2024 - Present

Gained practical, production-level experience building and supporting scalable back-end systems. Focused on API integration, asynchronous processes, and real-time data handling.

Core Technical Experience:

- Developed r**obust RESTful and GraphQL APIs** using P**ython (e.g., FastAPI, Django REST Framework**); managed data across both **SQL and NoSQL databases**.
- Implemented asynchronous and real-time features, utilizing **Websockets** for dynamic updates and **Celery/ Redis** for efficient background task processing and caching.
- Applied foundational knowledge of cloud environments, containerization (**Docker/Docker Compose**), **web application security**, and **webhook** communication patterns.

PROFESSIONAL EDUCATION

Thomas More University of Applied Science 09/2024-06/2027

Geel, Belgium

Educational program: Bachelor's degree, Applied Computer Science
Main subjects: Python programming, Web design with HTML and CSS, Full stack applications.

IT STEP College 09/2022-06/2024

Kyiv, Ukraine

Educational program: Professional education in Software development program with a major emphasis on developing practical programming skills.
Main subjects: Python application development, Python programming, Development of web applications, Software development methodology, Object-oriented programming, Theory of algorithms

IT STEP Academy 09/2020-06/2023

Kyiv, Ukraine

Educational program: IT program for young people with a hands-on approach(16 IT-related subjects) for studying how to create a websites, work with graphic editors, create games, and learn programming.
Main subjects: 3D modeling, Python programming, Web design with HTML and CSS, Designing mobile game programs, Game developing on Unity, Create gadgets on Arduino, Game design.

VOLUNTEERING

Organisation: Solidarites Jeunesses

secretaria@solidaritesjeunesses.org

Beaumotte, France 22/07/2023-05/08/2023

Collaborated with international volunteers and participated in social projects such as Globalisation and Refugees. Improved international networking and cooperation skills through effective teamwork.

SPORT

Professional gymnast with 12 years of training that helped develop such qualities as a desire for continuous improvement, resilience in achieving goals despite setbacks, and confidence in abilities. Participated in numerous competitions on regional and national levels, including the Championship of Ukraine. Obtained the title of Candidate for Master of Sports of Ukraine.
